I vetri utilizzati nei box doccia, in cristallo trasparente o cristallo extrachiaro, possono essere realizzati esternamente con decori in Duroglass. Alcuni possono avere motivi in positivo, codificato art...../P o in negativo, codificato art...../N.

Per calcolare il prezzo finale di un vetro bisogna sommare al prezzo della misura e finitura desiderata, il costo per la realizzazione del motivo, moltiplicato per il numero dei vetri decorati.

The glass used for the shower cabins either in clear glass or extra-clear glass, can be made with a "Duroglass" motif on the external side. Some of these can be in positive, with art. code /P or in negative with art. code /N.

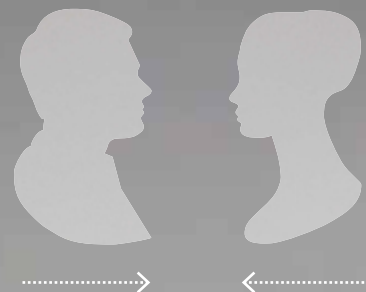

To calculate the final price of a shower glass, you must reference the price of the glass in the measurement and finish desired and add the cost of the motif in either positive or negative, multiplied by the number of glasses decorated.

Decoro in Duroglass per box doccia con anta scorrevole art. ON_OFF.

INFORMAZIONI BOX DOCCIA - SHOWER ENCLOSURE INFORMATION

1. Rivestimento - Tile Coating
2. Profilo inox - Stainless profile
3. Vetro (ridotto di 2,5 cm per lato, rispetto al piatto doccia) - Glass (reduced by 2,5 cm. on each side with respect to the tray)
4. Installare il piatto doccia perfettamente in bolla - Evenly install shower tray
5. Piatto doccia - Shower tray

Tutti i vetri utilizzati nei box doccia sono di spessore 8 mm temperati, trasparenti, extrachiari o acidati e vengono realizzati più corti di 2,5 cm rispetto alla misura del lato piatto doccia (FIG. **A** e **B**). I profili e le cerniere impiegati sono in acciaio inox satinato.

La Antonio Lupi Design SpA per ridurre al minimo le possibilità di errore nella trasmissione dell'ordine ed il conseguente invio di articoli non adatti alle vostre esigenze, consiglia di effettuare l'installazione secondo lo schema **C** (considerando un rivestimento di circa 1 cm), nel caso in cui venga installato secondo lo schema **D** si prega di trasmettere sempre all'Azienda le misure reali del vano ed eventuali fuori squadra.

Le regole per un corretto rilievo sono le seguenti:

- Segnalare eventuali fuori piombo delle pareti rispetto al pavimento o tra i due muri nel caso di nicchie.
- Per la realizzazione di prodotti su misura si deve sempre fornire un disegno con le indicazioni dell'installazione e le misure dei singoli elementi richiesti.

In caso di ondulazioni o fuori squadra di pareti, la Antonio Lupi Design SpA declina ogni responsabilità per eventuali difficoltà od impossibilità di installazione del prodotto, così come non risponderà per malfunzionamenti o perdite di acqua varie.

*All glass utilized for the shower cabins are 8 mm clear, extraclear or acid tempered glass, these are made 2,5 cm shorter than the complete length of the shower tray (FIG. **A** and **B**). The wall connectors and hinges are in satin stainless steel.*

*Antonio Lupi Design SpA advises installation as shown below in drawing **C** in order to avoid as many mistakes as possible. Considering a tile coating of more or less 1 cm in thickness if installed as in drawing **D** please always give exact measurements of the shower and eventually any unevenness in the walls or flooring.*

Follow the instructions below for proper measuring:

- Highlight any unevenness of the walls with respect to the flooring or between two walls if in a recessed area.
- For custom made items always provide a drawing with installation indications and the measurements of each single article.

In the case of any unevenness in the walls or floor Antonio Lupi Design SpA declines all responsibility for eventual difficulties during installation of the product, such as water leakage or malfunctioning due to such difficulties.

BOX DOCCIA A MISURA

Profilo in acciaio inox satinato per il fissaggio a parete dei vetri box doccia Art. VB e Art. ST.

Glass wall fixing profiles in satin stainless steel for shower glass Art. VB and Art. ST.

I vetri utilizzati nei box doccia, in cristallo trasparente o cristallo extrachiaro, possono essere realizzati esternamente con decori in Duroglass. Alcuni possono avere motivi in positivo, codificato art...../P o in negativo, codificato art...../N.

Per calcolare il prezzo finale di un vetro bisogna sommare al prezzo della misura e finitura desiderata, il costo per la realizzazione del motivo, moltiplicato per il numero dei vetri decorati.

The glass used for the shower cabins either in clear glass or extra-clear glass, can be made with a "Duroglass" motif on the external side. Some of these can be in positive, with art. code /P or in negative with art. code /N.

To calculate the final price of a shower glass, you must reference the price of the glass in the measurement and finish desired and add the cost of the motif in either positive or negative, multiplied by the number of glasses decorated.

Accessorio disponibile per tutti gli specchi con telaio in acciaio.

Accessory available for all mirrors with a polished steel frame

Sistema di comando per apparecchi luminosi con carico massimo 550W per un massimo di tre interruttori con funzione deviatore (quindi da ogni interruttore si può accendere e/o spegnere l'impianto luminoso) con l'innovativa tecnologia **touch led** (il comando viene attivato e disattivato al tocco del led luminoso).

Luce di segnalazione nell'interruttore con intensità che varia in base alla luce dell'ambiente con funzione crepuscolare al calare della luce ambiente il Led interruttore aumenterà automaticamente la sua luminosità (luce di cortesia) mentre al contrario all'aumento della luminosità dell'ambiente rientrerà automaticamente in posizione day.

La luminosità dell'interruttore Led di segnalazione può essere modificata per stare sempre in condizione day e quindi senza funzione crepuscolare, basterà coprire con il dito l'interruttore Led per tre secondi circa affinché non si noteranno degli impulsi di luce. In questa condizione il Led luminoso anche alla diminuzione dell'intensità della luce ambiente rimarrà sempre in posizione day. Ripetendo questa operazione il led interruttore ritornerà nella posizione 1 day and night.

*Lighting control device with a maximum operating voltage of 550W for no more than three switches with diverting functions (from each switch turn on/off the lighting system) with the innovative technology of **touch led** (touch switch operated).*

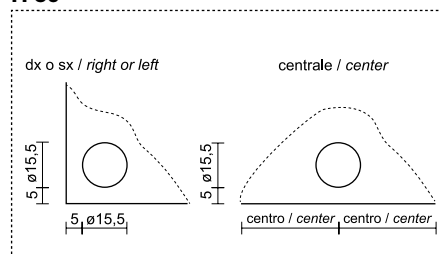

Nightlight function is activated automatically when it becomes dark. It will transform from its dim stand-by mode to a full light mode and will automatically deactivate when the room becomes bright.

The nightlight function may be deactivated if not desired. This is achieved by one long touch to the Led switch for at least 3 seconds until it gives off a very subtle glow. If this action is repeated you will return to position 1 night and day.

TALK

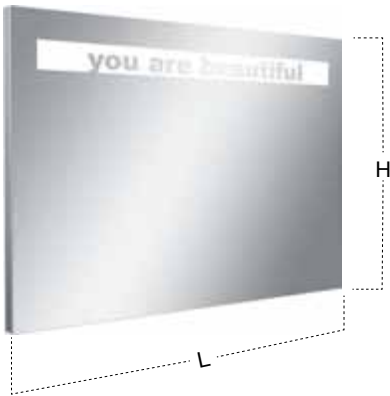

YOU ARE

fondo
abbiamo

acta exteriora indicant interiora

you are here
you are beautiful
you are what
you think
the future's in the mirror
the truth is that the truth changes
if you can't be the sky,
be a bird
